About Me:

Software developer with a passion for all things technology. I come with prior experience as an Operations Coordinator managing multiple successful application rollouts through my personal values of autonomy, client focused problem solving, and team based collaboration. I am looking to contribute and grow my skills as a software engineer.

Experience:

EduVerse - January 2023 - Present
Jr. Software Developer

- Designed and developed various UI elements using React and Chakra UI.
- Overseeing the creation of company social media profiles prior to product launch.
- Currently architecting a database schema using Python, Django, and SQL.

Campus Support - November 2021 - March 2023
National Operations Coordinator

- Contributed to the management of customized social media software, fostering campus to campus relationships nationwide.
- Responsible for the design and presentation of key financial, and strategic material to the executive team via Microsoft Excel.

Sleepy - June 2021 - November 2021
Freelance Software Developer

- Developed the design portfolio of a fashion designer. Website is based on React utilizing SASS and Framer Motion for styling and animation. Figma web UI used for wireframing.
- Utilized effective communication skills to foster business to client relationships, with the goal of providing a personalized solution based on client needs.
